ASSAY AUTOMATION SERVICES

Cell Based, Genomics, Proteomics

SIMPLIFYING

YOUR PARTNER FOR ASSAY AUTOMATION SERVICES

- ImmunoSite Technologies is a dedicated partner to pharmaceutical, biotech, and clinical research centers; driving project plans for assay automation that advance the performance of biological assays and processes.
- As a partner, IST takes the lead in selecting the best automation hardware and software solutions, designing and integrating the system, and demonstrating the assay performance.
- State-of-the-art GLP labs and the experienced staff at IST, are adept at facilitating the complete turnkey process of automation without burdening client resources.
- Exclusive automated assays are optimized and standardized at the IST Miramar, Florida facility; meeting or exceeding the client requirements in less time while providing the highest quality service.
- IST experience provides modular automated system designs that adapt to changes in the client workload and process to reduce the capital investment now and into the future.

Unique Value to Partnering with IST

NO OTHER COMPANY PROVIDES THE UNIQUE SERVICE OF DEMONSTRATING THE PERFORMANCE OF AN AUTOMATED BIOASSAY PRIOR TO INSTALLATION AT THE CLIENT SITE.

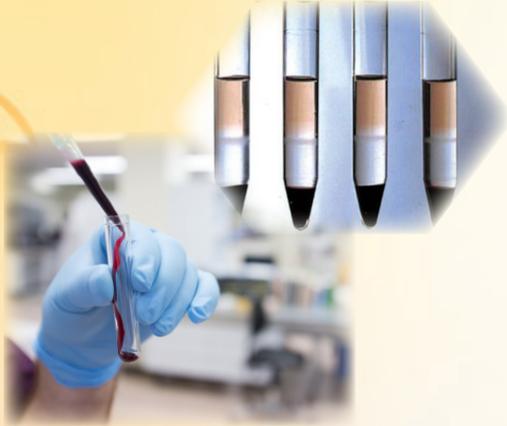

HOW MUCH AUTOMATION DO YOU REALLY NEED?

IST WILL MEET WITH YOU TO HELP ANSWER THESE QUESTIONS.

IF:	automation is a true benefit based on the client processes and workflow
WHEN:	to begin a project based on client timelines, budget, workload, and resources
WHERE:	to implement the project based on client space and time requirements, the project work can be performed at IST or the client site
WHAT:	milestones define the project based on total workflow and budget of the client
HOW:	to design the project using a best-of-breed approach or building on existing platforms
WHO:	is responsible for the design, planning, testing, documentation, optimization, purchasing, and other project activities are based on the client's total needs and resources.

THE COMPLEX

BENEFITS OF OUTSOURCING YOUR ASSAY AUTOMATION PROJECT

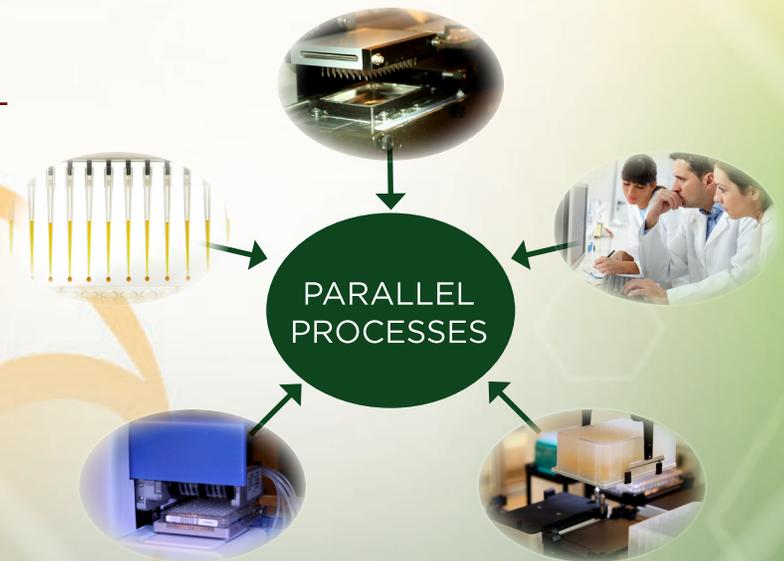

Cell Separation and Isolation

- Thoughtful design improves robustness of the process (precision, standardization)
- Custom user interface allows random access of precious samples without interruption
- Automation of manually intensive steps reduces labor cost

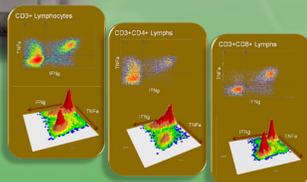

ELISA

- Multitasking parallel processes improves throughput
- Reduced development time improves time to market
- Bidirectional communication with information systems reduces the time to results and decreases data reporting errors

Cell Based Assay: Immunophenotyping/ICS

- Integrated processes decrease error caused by manual intervention
- Assay method optimization and timing control improves precision
- Assay characterization enhances performance

HOW CAN WE HELP YOU?

Contact us for a free consultation about the best approach to address your assay automation needs.

COMMITMENT TO QUALITY

Quality, audit success and high customer satisfaction set IST apart. Quality is central to our work and the value we deliver to our customers. Every IST employee shares a commitment to maintain the highest quality of products and services through a full quality management system and extensive training.
